TOOLWORX ANNOUNCES IMAGE ID PARTNERSHIP

BRIGHTON, Mich., <January 3, 2005>-- ToolWorx Information Products, Inc. ("ToolWorx"), of Brighton, Michigan announces that they have been accepted as an Authorized Reseller for ImageID Ltd. ("ImageID"), the developer of the Visidot AIDC solution. Visidot is a hardware/software system that can scan hundreds of standard 2D Data Matrix barcodes simultaneously from a distance. With Visidot, one reader can capture and decode a pallet full of items passing by on a conveyor instantly. This technology will provide ToolWorx customers with the same advantages as RFID technology, but without the high cost of RFID tags.

About ToolWorx

Founded in 1997, ToolWorx Information Products, Inc. is a developer of automated data collection applications, specializing in lot/part traceability and error proofing. Our flagship product suite, ToolWorx Bridge™, gives companies the ability to accurately collect information from the shop floor, warehouse or out in the field using barcodes, radio frequency identification (RFID) tags, or programmable logic controllers (PLC). The collected information is integrated real-time with a customer's internal enterprise business systems. We take pride in our ability to customize and install a system in less than 30 days. For more information, visit www.toolworx.com.

About ImageID

ImageID develops and markets multiple-asset Automatic Identification and Data Capture (AIDC) solutions based on imaging technology capable of reading and identifying hundreds of unique standard barcodes simultaneously. Through direct sales and its partner network in the US and Europe, the company provides comprehensive solutions for enhancing visibility throughout supply chains. ImageID's marketing and R&D efforts are spearheaded in Israel. More information is available at www.visidot.com.
