TOOLWORX RELEASES MOBILE DATA COLLECTION SYSTEM FOR INSPECTION AND SERVICE PERSONNEL

BRIGHTON, Mich., <September 25, 2007 >-- ToolWorx Information Products, Inc. ("ToolWorx"), of Brighton, Michigan announces the release of their latest mobile handheld software solution called TWMobile™. TWMobile™ was designed specifically for service workers like inspectors who currently fill out tedious checklists by hand and then have to type responses into their computers later. TWMobile™ uses standard Window-based handheld terminals (with optional bar code and RFID scanning) to easily and accurately record responses to questions along with corrective actions. With the addition of a mobile printer, TWMobile™ can even print inspection reports right at the customer site. All collected data can be immediately sent to the home office PC via docking station or wireless (local or cellular) to eliminate data entry and delayed billing. More information about TWMobile™ can be found on the ToolWorx website at www.toolworx.com.

About ToolWorx

Founded in 1997, ToolWorx Information Products, Inc. is a developer of automated data collection applications, specializing in lot/part traceability and error proofing. Our flagship product suite, ToolWorx Bridge™, gives companies the ability to accurately collect information from the shop floor, warehouse or out in the field using barcodes, radio frequency identification (RFID) tags, or programmable logic controllers (PLC). The collected information is integrated real-time with a customer's internal enterprise business systems. We take pride in our ability to customize and install a system in less than 30 days. For more information, visit www.toolworx.com.
