

- Specialize in data collection systems for the manufacturing and distribution industries
- Developed ToolWorx Bridge™ to provide customized, *not custom*, data collection solutions that are affordable, easy to use, and expandable
- RFID Authorized Honours Partner for Intermec; Microscan Preferred Partner
- Principals have over 30 years experience in Automated Data Collection

ToolWorx SmartPack™

- Eliminate container mislabeling caused by human error, especially with left-hand / right-hand, multi-colored, similar, and sequenced parts
- Scan part labels at packing and print container labels with no PC in the middle
- “Earn” your container label via Scan-To-Create error proofing process
- Printer can be configured for Part Match, Part Sequencing, Quantity Verification, and Traceability error proofing
- All data collection devices communicate directly to the printer so labels can be created regardless of the status of the network backbone
- Exchange data between PC databases and the printer (through either wired Ethernet or wireless connectivity) using ToolWorx PTServer™
- Combine with a label applicator for automated container labeling
- Printers are interchangeable so you avoid excessive downtime or reprogramming
