

***Guaranteed Success. Passionate Customer Focus.  
Flexible Solutions.***

These are the words used to describe what ToolWorx brings to each and every customer engagement.

We are a systems integrator specializing in automatic identification applications for part traceability and error proofing. All of our systems are based on our unique toolset that allows us to deliver configurable applications that conform to the way that you do business, letting you maintain your competitive advantages.

Our primary focuses are:

- Error / Mistake Proofing for Zero Defects
  - Eliminate mixing parts in containers
  - Eliminate mislabeling containers
  - Eliminate incorrect shipments
- Part / Lot Tracking to contain product recalls
  - Manage / contain product recalls to minimize financial burden
  - Assist in root cause analysis
  - Maintain traceability for customer and/or government mandates

We deliver end-user solutions quickly and our systems are bullet-proof. If your company has objectives of Zero Defects, recall containment, compliance with government regulations (like the Bioterrorism Act), lean initiatives, or just interested in applying new technologies (like RFID), call us for a no-charge analysis.

***Traceability for the critical parts of your business...***

## *ToolWorx Product Suite*

- TWAsset™ Asset Tracking System
  - Manage fixed assets at any location, either local or remote
  - Use handheld mobile computers to scan / capture serialized inventory
  - View asset history, location, and transactions
- TWLot™ Lot Traceability and Recall Management System
  - Part Traceability & Recall Management with built-in error proofing
  - Utilizes bar codes (one- and two-dimensional) and RFID tags
  - Integration with ERP Systems and PLCs
- TWMobile™ Mobile Inspection System
  - Designed for inspectors, repair, and other service personnel
  - Record Questions/Answers/Corrective Actions in real-time
- TWPLC Printer™
  - Eliminates mislabeling by printing labels directly from machines without a PC or human intervention
- ToolWorx Smart Pack™ End-of-Line Error Proofing System
  - Eliminate labeling and packing errors at the end of a production line or packout area without a PC
  - Print shipping and customer labels in real-time
- TWTool™ Tool Crib System
  - Maintains crib parts inventory and tool tracking together in one system
- TWTrack™ Returnable Container Tracking System
  - Uses bar codes or RFID tags to ensure that returnable containers are actually returned
- TWWarehouse™ Warehouse Control System
  - Mid-tier warehouse control system integrates with any existing order entry or inventory management system
- Other
  - NiceLabel™ Enterprise labeling design and print system
  - Siemens FactoryLink™ Production Automation Software
  - Radio frequency terminals and backbone, barcode printers, handheld computers, fixed station terminals & scanners, and RFID technology
  - Labels, ribbons, preprinted labels
