

ToolWorx Smart Printer Applications

- Increases ROI
- Reduces TCO
- Future-proofs labeling
- Saves valuable floor space
- Simplifies infrastructure
- Eliminates the most common problem associated with Label Printers- *Mislabeling*

PLC Printer™ for part labeling

- Ensures that every part is labeled correctly
- Eliminates the need for any human intervention to set up the label
- Minimizes PLC programming by eliminating the need to program label formats, label data, printer commands, and serial / ASCII handling from the PLC ladder logic

SmartPack™ for container labeling

- Ensures that the correct shipping label is placed on the container
- Ensures that the correct quantity of parts is loaded into the container
- Ensures that all the parts match

VPrinter™ for bar code verification

- Combines Intermec Smart Printers with the RJS SV100 Verifier
- Verifies the quality of bar codes as they are being printed and voids them if they don't pass the grade
- Automatically reprints any labels that "Fail"

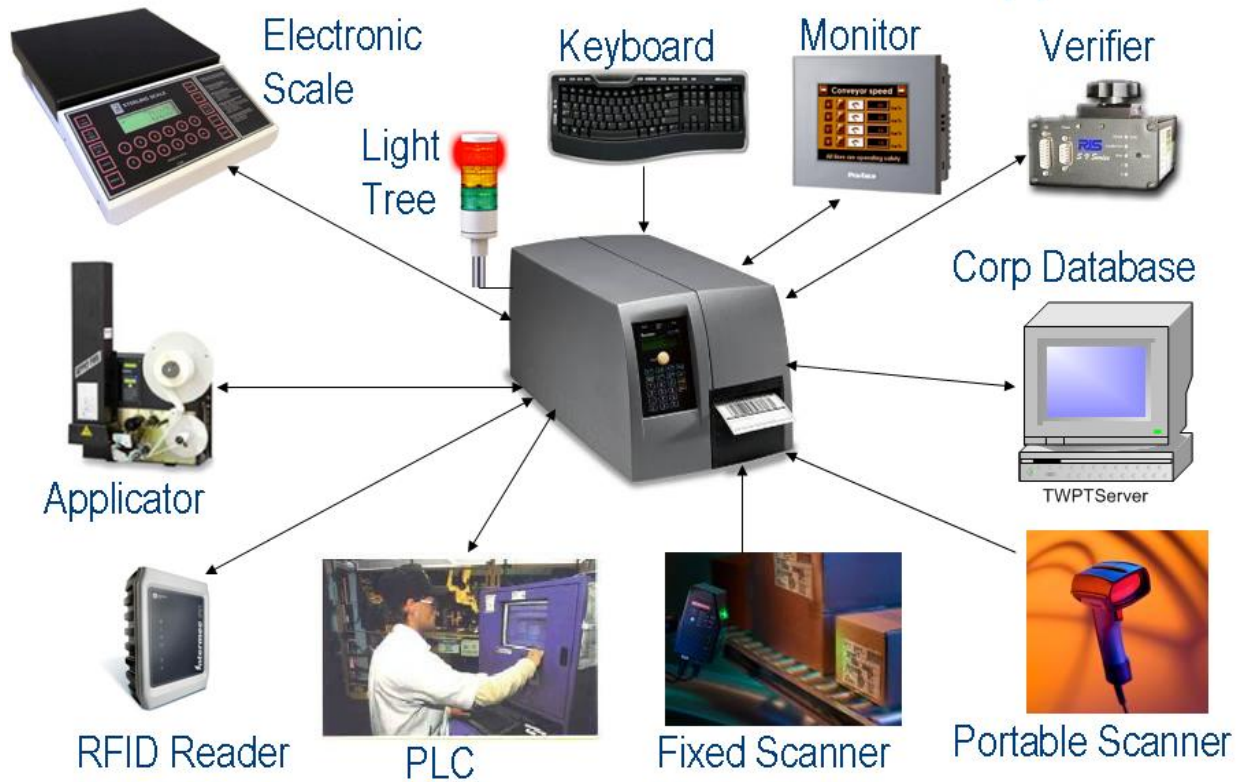

SmartApply™ for print and apply systems

- Eliminates container mislabeling caused by human error and centralized batch label printing processes
- Weighs/identifies containers at packaging and print and apply container labels with no PC in the middle
- "Earn" your container label via ToolWorx Smart Printing error proofing process

PTServer™ and **PTClient™** for communications and printer management outside of the printer

- Enterprise labeling software for Intermec Smart Printers in native Fingerprint mode
- Combines ToolWorx software with Intermec printer management and label development software
- Independent label printing even when the network is not available
