

ToolWorx SmartPTI™ Suite

SmartPTI™ Technology

SmartVision™ fully automated labeling system for harvesters

- Combines vision and scanning technology to provide a fully automated hands-off labeling system that can stand the rigors of harvester life in the field
- Determines which products are in the carton and prints the appropriate GTIN every time

SmartButton™ semi-automated push button labeling system for harvesters

- Uses a programmable push button box to allow operators to get a label just by the push of a button
- All label info (GTINs, lot number, descriptions, etc.) is stored inside the Smart Printer

SmartTrailer™ mobile field labeling system for batch printing

- Just scan the product id and the number of labels needed into the printer and get PTI labels automatically
- Runs off a battery-powered Power Box so you can operate without electrical connection in a trailer or truck in the field

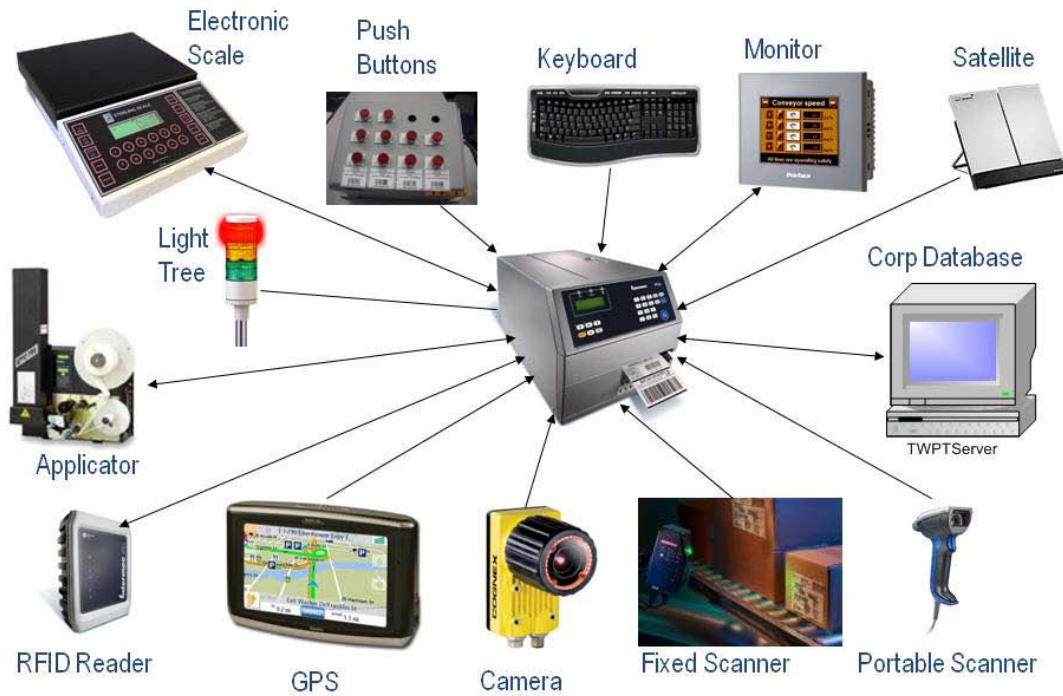

SmartRepack™ batch/individual labeling system for repacking in shed

- Like SmartTrailer™ but used when you need to repack and relabel product
- Can run off a battery-powered Power Box or Power Cart so you can operate without electrical connection and/or need mobility within the shed

SmartPallet™ hybrid pallet labeling system

- Build a hybrid pallet label by simple scanning of case labels and templates with minimal operator intervention
- Optionally send that data directly to your business system via LAN, WAN, WiFi, Cellular, or Satellite whether you are inside a facility or in the middle of a field
